

This is a [Next.js](#) project bootstrapped with [create-next-app](#).

Getting Started

First, run the development server:

```
npm run dev
# or
yarn dev
# or
pnpm dev
# or
bun dev
```

Open <http://localhost:3000> with your browser to see the result.

You can start editing the page by modifying [app/page.tsx](#). The page auto-updates as you edit the file.

This project uses [next/font](#) to automatically optimize and load [Geist](#), a new font family for Vercel.

Learn More

To learn more about Next.js, take a look at the following resources:

- [Next.js Documentation](#) - learn about Next.js features and API.
- [Learn Next.js](#) - an interactive Next.js tutorial.

You can check out [the Next.js GitHub repository](#) - your feedback and contributions are welcome!

Deploy on Vercel

The easiest way to deploy your Next.js app is to use the [Vercel Platform](#) from the creators of Next.js.

Check out our [Next.js deployment documentation](#) for more details.
